GUIDE *CODE BODIES*

	SUMMARY OF CODE ADMINISTRATORS AND RELATED BODIES			
@ *Link*	**Code**	**Note**	**Administrator**	**CACoP**
@ *BSC*	Balancing and Settlement Code	Participation in balancing market	Elexon	Y
@ *CUSC*	Connection and Use of System Code	Connection and use of high-voltage transmission system and balancing services	NGET	Y
@ *D-Code*	Distribution Code	Technical parameters of distribution system	ENA	Y
@ *DCUSA*	Distribution Connection and Use of System Agreement	Commercial aspects of the distribution networks	Electralink	Y
@ *Grid Code*	Grid Code		NGET	Y
@ *JESG*	European Network Codes	JESG is a stakeholder group for codes development		N
@ *iGT UNC*	Independent Gas Transporters Uniform Network Code		Gemserv	Y
@ *MRA*	Master Registration Agreement	Retail market processes including electricity registration, change of supplier	MRA Service Co via Gemserv	Y
@ *SEC*	Smart Energy Code	Rights and obligations of energy suppliers, network operators and other parties involved in smart metering	Smart Energy Code Co via Gemserv	Y
@ *TRAS*	Theft Risk Assessment Service		Electralink	N
@ *SMICoP*	Smart Meter Installation Code of Practice		Electralink	N
@ *SPAA*	Supply Point Administration Agreement	Interoperational agreements between gas suppliers and shippers in the UK retail market. Includes approved meter installer code of practice and meter asset managers code of practice	Electralink	Y
@ *SQSS*	Security and Quality of Supply Standard	Technical aspects of supply	NGET	N
@ *STC*	System Operator/Transmission Code	Relationships between system operator and transmission owners	NGET	
@ *UNC*	Uniform Network Code	Rights and responsibilities of users of the gas network	Joint Office of Gas Transporters via Xoserve	Y
@ *GDAA*	Green Deal Arrangements Agreement	Not strictly a Code but a multiparty contract serviced by Gemserv		

There is no formal definition of a code administrator and the scope, systems and change processes vary between codes. CaCOP: to be covered by Code Administration Code of Practice. Suggestions to facilitate greater engagement have included reconstituting the Cross-Code Electricity Forum, which was previously run by Elexon in partnership with National Grid and ElectraLink.
